LCS²

from technical room to workstation

■ LCS² Cabling system products

Complete systems with a 20-year guarantee.

The new LCS² cat. 6A (up to 500 MHz), cat. 6 (up to 250 MHz) and cat. 5e (up to 100 MHz) systems have been designed as coherent entities to optimise their performance.

The systems are suitable for optical fibre cables as well as copper cables.

See pages 14 to 39

■ Legrand Synergies

The new LCS² systems integrate perfectly in the various other Legrand solutions: DLP trunking system, cabling accessories, cable management, etc.

See pages 40 to 53

Towards network convergence.

The IP convergence products (IP telephony, IP remote monitoring, IP access control) can also be a part of the LCS² systems.

System guaranteed performance of the Legrand systems

Measurements of LCS² components and links, validated by independent laboratories 3 P Third Party Testing and ETL, have highlighted its triple performance.

Performance of the transmission in cat. 6A, performance of the installation, performance of the maintenance.

1 Performance of the transmission in cat. 6A

For long distance, 10 Giga guarantees only slight signal loss for 100 m. For short distance, 10 Giga guarantees a good echo resistance for 15 m.

2 Performance of the installation

The values measured widely exceed the requirements of the ISO 11801 standard, Edition 2, amendment 2, thus providing a safety margin to conform to the most rigorous constraints of the installation.

3 Performance of maintenance

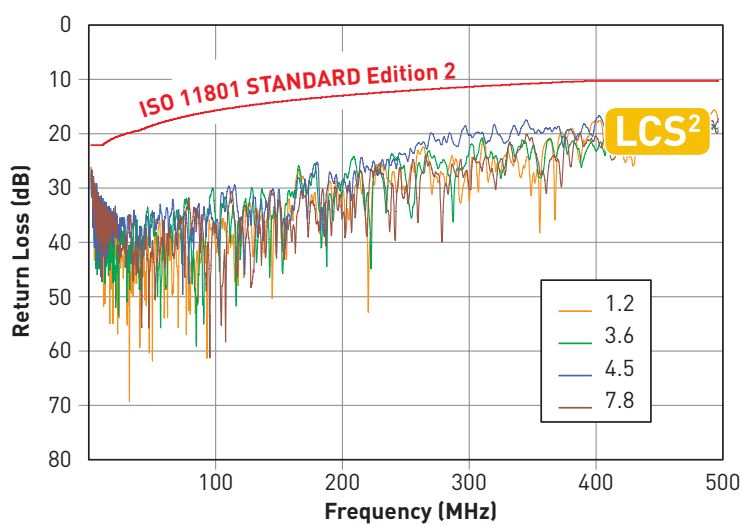

Being committed to deliver a durable LCS² system, Legrand gives a 20-year guarantee on its performance.

Note: all LCS² products are RoHS compliant.

New LCS² connector

Performance of the installation

RJ 45 connector is the core element contributing to the performance of the LCS² system.

You can obtain a perfect connection within a few seconds guaranteeing an optimum performance of the link from the patch panel to the RJ 45 socket (see page 46).

Insert the cable in the rear part

Visibility of the marking as per the TIA/EIA code. Takes all cables currently available on the market: U/UTP, F/UTP and SF/UTP.

Separate and insert the strands

Intuitively maintain 13 mm, no need to measure.

Add the upper part of the connector

The tamperproof insert gives ease of movement.

Turn to guarantee the connection

Simply turn to flatten the strands simultaneously. Cut them, and the connector is ready!

Performance all categories

Thanks to the connectors

LCS² Patch panels

Performance of maintenance

The design of the new LCS² patch panels optimises the mounting and maintenance.

Maintaining the cables with cable guides, blocks of 6 RJ 45 connectors, clipping and unclipping each connector from the front panel.

Better fixing by clamp
Cable maintained in its cable guide.

Room for maintenance
Simple unclipping of LCS² connectors.

Panels provided with quick-fixing system
Universal mounting any rack or cabinets.

The new LCS² panels can also be fitted with:

Telephone block

FC type video broadcast block

LC fibre optic cassette

Legrand cables and cords

coherence and performance

To ensure total coherence of its LCS² cat. 6A, cat. 6 and cat. 5e systems,

Legrand offers a range of 4 twisted pair cables
in the four types: U/UTP, F/UTP, S/FTP, SF/UTP.

■ High-quality manufacturing

Manufactured to high quality standards,
with thicker insulation to reduce the effects
of crosstalk, and reduction of the twist pitch of the pairs:
the quality of Legrand cables is suitable for the LCS²
category 6A, category 6 and category 5e systems,
ensuring high performance from the patch panel right
through to the RJ 45 socket. What's more, Legrand offers
its cables in 2 versions with sheaths suitable for different
environments: LSZH and PVC. The 3P laboratory
has certified all the Legrand cables to be compliant
with the ISO IS 11 801, EN 50173-1 standards
and TIA/EIA-568-C.2.

Ensure high-quality continuity-perfect
plug connection and transmission performance...
Available in several colours.

■ Individually tested cords

Legrand patch cords ensure high-quality continuity in a cabling system like other components. Legrand therefore takes the same care with the quality of its complete range of RJ 45 cords, which are certified by the 3P laboratory as compliant with the standards. [See catalogue pages](#)

■ Tests on all parameters

Legrand cords are individually tested, both for continuity and transmission performance. All the parameters are measured: CR, ACR, NEXT, Return loss, Attenuation, etc. Cords which do not meet the criteria are rejected. These tests guarantee transmission performance from one end of the system to the other, with both class D and class E.

■ Universal cords

Available in cat. 6A, cat. 6 and cat. 5e versions and in the three cabling types (U/UTP, F/UTP and SF/UTP). Legrand cords are available in different lengths, thus offering considerable flexibility of use.

Connecting fibres

Legrand simplicity and performance

Legrand solutions, including the rapid crimping connection process and pre-fitted fibre optic links on demand have made a significant contribution to placing fibre optics within the reach of installers, particularly for links within buildings or between buildings, over distances of less than two kilometres.

The basic steps

Preparation of the fibre :

Stripping

Cleaving

Connection takes just 3 minutes with Legrand rapid connectors

The average time for making this connection is less than 3 minutes with rapid connectors Cat.Nos 0 326 52 to 0 326 61 incorporating a factory pre-polished fibre. After the operations to prepare the fibre, there is no longer any need to glue or polish, or to check the quality of the connection under a microscope! No oven, no drying. The factory pre-polished connectors ensure that the operation is simple and results in a high-quality connection.

Inspection

Tip

Consider leaving some fibres in reserve for future development of the installation. If you require 2 or 4 fibres now, install cables with 6 or 8, or if you require 6 to 8 fibres now, install cables with 10 to 12.

Connection

Insert the fibre in the connector

Slide the switch on the connector - the splice is done

Slide the boot onto the connector

Pre-fitted fibre optic

Pre-fitted fibre optic links on demand: save time and cut risk to a minimum.

Order your own individual solution: pre-fitted and factory tested, it will save you time on site while ensuring a high level of link reliability. This minimises the risk of malfunction during the installation, thereby simplifying the acceptance test.

What is delivered?

Each link is supplied with a test report. Length stands from connector to connector, in metres. Links up to 50 m are conditioned in boxes (reel optional) and those over 50 m are supplied by reel. Connectors are protected by a sheath. Pulling ring included. Multimode 62.5/125 μm cable complies with OM1 category, 50/125 μm with OM2 or OM3 category and single mode with OS1 category.

How to order

1. Once your preparatory installation work is done, determine the required length of cable.
2. Indicate the required type of fibre:
 - indoor, indoor/outdoor or outdoor
 - multimode 62.5/125 μm or 50/125 μm or single mode 9/125 μm
 - number of cores (4, 6, 12, 24 for indoor applications, outdoor applications and indoor/outdoor applications)
3. Specify the type of connector: ST, SC or LC.
4. State your preferred form of delivery: box or reel.

19" LCS² enclosures Optimised management of cables and patch cords

The design of the new LCS² enclosures facilitates managing the cables and patch cords.

Easy association of a unit dedicated for cords, cable entry at the top made easy, new feedthrough panels for perfect organisation of patching...

1

Enclosures

The structure allows easy cable entry at the top and bottom of the enclosure. In the case of reduced room access space the structure can be completely dismantled.

5

Respecting of the bending radius

Cable management panels with rings to guide and protect the patch cords.

2

Optimised cable management

The enclosures are offering lots of space besides the 19" uprights to guide and fix large quantities of cables.

3

Linking interface

Protects the cables and guarantees the bending radius between enclosure and cable trunking.

4

Easy cable entry

Enclosure and cable management unit are equipped with pre-cuts (19") that accept cable feedthrough panels.

19" LCS² enclosures simplified assembly

The new LCS² enclosures can be very easily assembled and dismantled.

A considerable time-saving on the sites, complete accessibility thanks to the removable side and rear panels and a structure that can be entirely dismantled.

1

Easy installation
Dual marking of 19" uprights.

2

Total accessibility
A structure that can be completely dismantled.

3

Automatic grounding clip
Guarantee of grounding for the side and rear panels with the automatic grounding clip.

Combinations that answer various needs

Two 600-mm-wide enclosures with a cabling unit.

Two 800-mm-wide enclosures side by side.

LCS² 19" High Density racks Advanced cable management

The new LCS² racks offer full cable management for optimizing your network performance.

In addition to the support strength, the LCS² cable management systems provide flexibility from the system design stage through to any future extensions.

Innovative cord management cages

With individual conduit for each rack unit and door that opens in both directions.

Cord management panels with cover

With conduits for vertical and horizontal cord organization.

Integrated upper trunking

For compliance with the bending radius and organized running of cords.

Light stainless-steel aluminium construction

With black powder finish, resistant to marks and scratches.

LCS² 19" Server enclosures Complete accessibility

The new LCS² server enclosures are designed for complete accessibility.

Complete accessibility not only via the doors and panels, but also thanks to the rooftop pre-cuts and opening of the enclosure below.

Doors and panels with keyless lock system

- front door with handle
- perforated front and rear doors - 80% microperforation.

Cable entry

- 19" High pre-cuts
- open bottom.

Support with screwless tray fixing - Cablofil.

Power Distribution Unit

- different international outlets standards to supply energy to your active devices
- 19" and vertical PDU (direct mounting)

19" LCS² cabinets

Easy access, high-quality finish

The new LCS² wall-mounting cabinets can be fitted anywhere where maintaining aesthetic quality is very important.

The removable side panels and flexible cable entries (in the fixed cabinets) facilitate access for quick installation and easy maintenance.

1

Flexible cable entries
In DLP trunking system format.

Total accessibility
Also available with pivoting body to enable easy access at the back. Removable side panels on all LCS² cabinets.

Wi-Fi that can be installed just like RJ 45 sockets

Wi-Fi access points can be fitted anywhere where unrestricted access to the computer network is required.

They can be fitted just like the RJ 45 sockets and on any supports. The stability of performance and the durability of products are guaranteed (see page 53).

Wi-Fi access points: essential mobility...

- In an environment where multiple Wi-Fi networks operate together, to optimise the available speed everywhere in the building (in compliance with 802.11 a + b/g and 802. 11 n standards).
- In reception areas and passages, to provide network access anywhere in the building (in compliance with the 802.11 b/g and 802. 11 n standards).
- In shared work areas, to connect a computer permanently and provide a wireless connection to temporary users (in compliance with the 802.11 a + b/g and 802. 11 n standards).

The Wi-Fi access points can be mounted on any support:

Columns, mini-columns, snap-on trunking, floor boxes, etc., mural or on Cablofil.

Classes to convert the telephone and computer network needs of your clients into complete and upgradeable solutions, and cabling them as per the standards in force.

Assurance of performance

Two guarantees to ensure the durability of your installations

The 20-year performance guarantee:

Legrand offers the installer the guarantee of continuity of performance levels of an LCS² cat. 6A, LCS² cat. 6 or LCS² cat. 5e system on link or channel over time.

The 20-year components guarantee: Legrand offers the installer the possibility of extending the usual guarantee from 2 years to 20 years on all products used in link or channel.

- The components guarantee of the LCS² cat. 6A, LCS² cat. 6 or LCS² cat. 5e systems: Legrand offers an extended guarantee on the components of the LCS² cat. 6A, LCS² cat. 6 or LCS² cat. 5e systems. 20 years for the components of channel or link, i.e. patch panels, RJ 45 sockets, cables and cords.

The contractual 2-year guarantee on these products is thus extended to 20 years.

- The channel performance guarantee:

A channel is defined by the standards as being an assembly consisting of the following components: patch cord, patch panel, cable, RJ 45 socket, user cord. During acceptance testing, the performance of the channel is measured over a maximum length of 100 m. It must remain constant over time.

The performance of an installation must stand the test of time.

This is why Legrand guarantees the performance and the components of its LCS² cat. 6A, cat. 6 and cat. 5e systems over the entire channel or link for 20 years.

Conditions of the 20-year Performance Guarantee

As with any guarantee contract, certain conditions must be met in order to qualify for the Legrand 20-year Performance Guarantee. These conditions are naturally within the capabilities of any company specialised in the installation of structured cabling systems.

The main conditions are given below (extracts from the 20-year Performance Guarantee issued by Legrand). The installer has stored the components in storage conditions suitable for their type.

The installation has been built in strict compliance with good practice and abiding by all the conditions listed below.

All the components used in the cabling system must be Legrand LCS² cat. 6A, LCS² cat. 6 or LCS² cat. 5e Cabling Systems components.

All the patch cords used must be original Legrand products.

The max. length of a cord must be 5 m.

The installation must be built in accordance with the recommendations defined in installation standards EN 50174, EN 55022 and UTE C 15-900 in force at the time of issue of the guarantee.

Prior to the signature of the guarantee contract, Legrand will check that the installation acceptance test data comply with the values specified in the standard.

The installer must submit the following 4 documents to Legrand:

- The installation acceptance test for the link or the channel
- The "14 key points of a high performance installation" form, ticked and signed as agreement on its part of having complied with the 14 points
- A full list of the products installed
- An installation diagram of the patch cabinets and the RJ 45 sockets.

Any subsequent modifications or extensions must comply with the conditions listed above.

LCS² performance from technical room to workstation

The new LCS² system integrates perfectly in various other Legrand solutions:
DLP trunking system, cabling accessories, cable management, etc.

DISCOVER A COMPLETE SOLUTION

A perfect connection from the cabinet to the socket

- Cabinets: 19" or 10" wall-mounting cabinets, freestanding and server freestanding cabinets for an easy installation and efficient maintenance
- Cat. 6A, cat. 6 and cat. 5e: patch panels, units of connectors, RJ 45 sockets, cables and cords

▶▶▶ Wall-cabinets and freestanding cabinets, p. 92 to 101

▶▶▶ Cables and cords, p. 63, 67, 72, 77, 83

▶▶▶ Patch panels and units, p. 62, 66, 72

▶▶▶ Sockets, p. 64, 65, 68, 69, 73, 79

Additional components for performance and extension

- Fibre optic: simple and reliable option
- Area distribution boxes: for consolidation and redistribution
- Wi-Fi access points: For fitting just like RJ 45 sockets and on other supports

Legrand cabling system LCS² area distribution boxes

Dimensions

Performance

Maximum recommended lengths of links to ensure high performance of the systems with the use of RJ 45 sockets with copper feedthroughs and/or RJ 45 sockets

	Length associated lengths (m)		
	Cords	Cables	Links
Cat. 6	8	70	78
	15	60	75
	20	55	75
Cat. 5e	8	75	83
	15	65	80
	20	60	80

We recommend selecting the shortest wiring lengths for more flexibility regarding cord length in the event of reconfiguration

Application example

An area distribution box is installed to connect the RJ 45 sockets and meet the future requirements of the installation

Connection to additional RJ 45 sockets is done by adding RJ 45 - RJ 45 cords between the unit and the RJ 45 sockets with copper feedthrough

Legrand cabling system LCS²

fibres optic

optic connectors

■ Technical characteristics

- Connection of connectors on 900 µm fibre
- Maximum attenuation 0.3 dB
- Ideal for high-speed systems: 10 gigabit Ethernet
- Operating temperature: 0 to 65 °C
- Shallow connectors

■ Advantages:

- High quality finish
 - Can be reused 5 times
 - Shallow connector, depth less than 40 mm
 - Connector factory pre-polished and does not require any glue
 - No special tools, easy to transport
 - Speed of installation: simple connection process, quick training
- It takes less than five seconds to fit the connector

■ The basic steps

Preparation of the fibre:

Stripping

Cleaving

Inspection

Connection:

1/ Insert the fibre in the connector

2/ Slide the switch on the connector - the splice is done

3/ Slide the boot onto the connector

Finally, the visual fault locator is used to check the connection.

■ Rapid crimping connectors with tool case Cat.No 0 326 90

Types of connector

- ST connector: Helical shape locked by "push and turn" bayonet type connector

- SC connector: Rectangular shape "push-pull" latch type locking Suitable for a large number of active devices Recommended in the generic standards ISO/IEC 11801 and EN 50173

- LC connector: Rectangular shape tab locking Half the size of a conventional connector

The LCS² system supports 10G applications Base-T up to 100 m in a transmission channel. Conforms with standards ISO/IEC 24750, TIA TSB 155 and IEEE 802.3 an.

The Ea link class of the LCS² system also conforms with amendment 1 (04/2008) of standard ISO 11801 and its components conform with amendment 2.

LCS² systems are certified by expert independent laboratory 3P

Cords and cables: ISO 11801 id.2.0, EN 50173-1, TIA/EIA 568

General characteristics:

- 6 or 12 incoming ports (depending on Cat.No) RJ 45 wiring
- 4 to 8 or 12 outgoing ports (depending on Cat.No) maximum
- Connection of mixed cords via RJ 45 connector (RJ 45/stripped)
- UTP and FTP versions
- Cat. 5e and 6
- for computer applications; telephone, access control etc.

Technical characteristics:

- material: Polycarbonate PC hood
Polypropylene PP base
- colour: RAL 7035
- Weatherproofing protection index: IP 21
- Mechanical shock protection index: IK 07
- hold connector units in place in the box: 100 N
- Cables anchored on support using Colring cable ties

Installation principle for a Wi-Fi access point with Power over Ethernet injector

Particular case of the 1 port PoE: Clips directly onto a port on any patch panel. A single cord is necessary to connect it to a port on the switch

Benefits of a Legrand Wi-Fi access point

- Possibility of simultaneous operation on 2 frequencies, a and b/g
- New products: invited access: used to allocate a network dedicated to visitors
- Provides a max. gross speed of up to 2 x 54 Mbps in simultaneous mode
- Very high security level: WPA2 encryption (802.11i) and authentication (802.1x)
- Possibility of roaming (moving from one access point to another without breaking the link)
- Quality of service (priority automatically given to voice, then video and finally data)
- Easy to configure and make secure: using the CD supplied with the access point

Installation

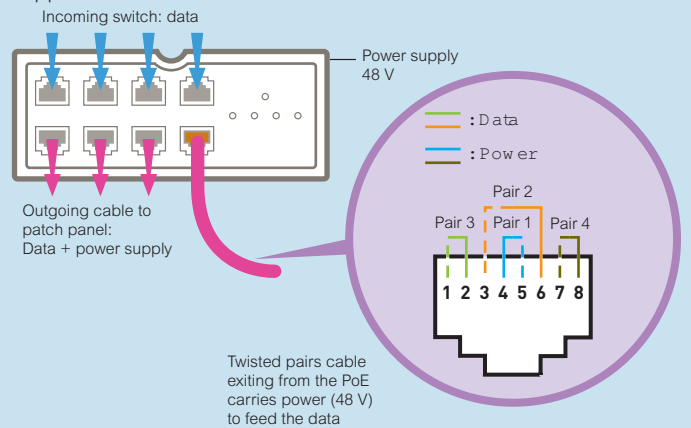

In all supports able to take a Mosaic mechanism (trunking, columns, flush-mounting boxes, floor boxes, etc.)
Do not place access points behind anything that could limit the antenna's range
Access points are connected tool-free via an RJ 45 connector

Sizing

- Provide 1 access point for 1 localised requirement (in entrance hall)
- Provide 1 access point per 100 m² for overall coverage and a maximum gross speed
- Provide 1 access point with an RJ 45 socket for a desk used by visitors

Operation of PoE injector

A PoE injector has one input and one output per access point to be supplied

Twisted pairs cable exiting from the PoE carries power (48 V) to feed the data

Legrand cabling system LCS²

LCS² 19" and 10" wall-mounting cabinets

General characteristics

Metallic wall-mounting cabinets
 RAL 7016 textured polyester coating providing excellent resistance to corrosion and scratching
 Front safety glass door
 Protection index (weatherproof) against solid objects and liquids: IP 20
 Protection index against mechanical shocks: IK 08
 Perforations in uprights: 9,5 x 9,5 mm
 Permissible load: 3 kg/U (or 48 kg for a 19" cabinet 16 U)
 12 kg for the 10" cabinet 6 U

Compliance with standards

LCS² cabinets comply with the following standards:

IEC 60529 EN 60529	(NF C 20-010) Degrees of protection provided by enclosures (IP code)
IEC 62262 EN 62262	(EN 50102, NF C 20-015) Degrees of protection provided by enclosures of electrical material against external mechanical impacts (IK code)

IEC 60297-1 & 2 DIN 41414-7	(NF C 20-150, NF C 20-151) Sizes of mechanical structures of the 482.6 mm (19 in) series

LCS² cabinets can be integrated into installations complying with the following standards:

EN 50173-1	Information technology - Generic cabling systems
EN 50174-1 & 2 C 90-480-1 & 2	Information technology - Cabling installation
ISO IEC 11801	Information technology - Generic cabling for customer premises
