WIND LIGHT PRO

AUTOMATION FOR SLIDING DOORS UP TO 120 Kg

Self-bearing cover for an easier inspection from outside

External digital key pad to program, select, set-up functions without operating on control unit

Manual selector with knob for an easy standard functions selection

Operating status led

Battery charge monitoring

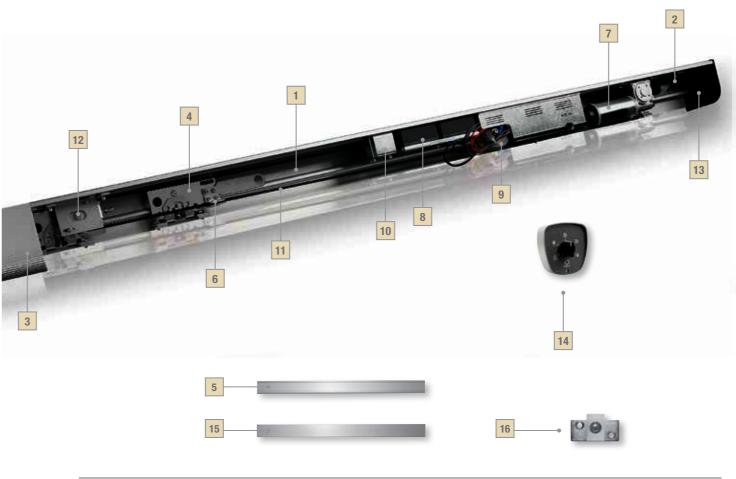

Safety device surveillance

Possibility to program the door via digital selector with display EASY

Characteristics: Visualization of door status mode Programming Parameters regulation Diagnostic **Parameters control**

TECHNICAL DATA		
power supply	230 V 50/60 Hz	
consumption max	80 W	
accessories power	24 Vdc	
battery charger	charge voltage 27,5 Vdc I max 200 mA with control in voltage	
electric motor	24 Vdc maximum power 100 W	
opening speed	adjustable max 70 cm/s (for leaf)	
closing speed	adjustable max 60 cm/s (for leaf)	
anti-crushing device	standard	
opening pause time	adjustable from 0 to 60 sec.	
operating temperature	-20° + 55°	
transmission type	toothed belt	
protection degree	IP 22	
max weight one leaf	120 Kg	
max weight two leaves	80 Kg + 80 Kg	
use	intensive	

PART IDENTIFICATION

1. 10 MICRON CHEMICAL SILVER OXIDIZED ALUMINIUM	8
BAR AND 500 mm STEP CAPACITY	9
2. MECHANICAL STOP	10
3. OXIDIZED ALUMINIUM BOX	11
4. CARRIAGE	12
5. ADAPTOR	13
6. TRACTION BRACKETS	14
7. MOTOR WITH ENCODER	15
	16

WIND LIGHT PRO AUTOMATION

Key Doors are a new series of straight sliding hi-tech automatic systems for very intensive use, with high technical content and silent operation. They offer many features mixed with quality and reliability and are easy to install and program. The traction unit and the electronic control panel in one unit reduce the assembly time. Moreover Key Doors offers solutions with appropriate anti-panic break-out devices allowing easy access to escape routes. The complete range offers solutions for all requirements of size, use and weight

TECHNICAL FEATURES

Key Doors are provided with a 24 Vdc motor, a microprocessor electronic control panel and an electronic impact-free device with encoder. Control unit learn door weight and stroke length with a simple self learning procedure. The casing is made of aluminum extrusion and, thanks to a special locating hook system, there is the possibility to "hold open" the profile cover without supporting it. Faults are displayed on the selector screen
